Art Unit: 2873

1. Claim 61 filed on 2/22/02 was redundantly claimed. Base on the requirement of 37 CFR 1.126, claims 61-70 have been renumbered as 62-71. Applicant should note this change in any future.

Claims 62-71 filed on 5/6/02 were redundantly claimed. Base on the requirement of 37 CFR 1.126, claims 62-71 have been renumbered as 72-81. Applicant should note this change in any future.

Claims 72-81 filed on 5/6/02 are **identical** to claims 62-71 filed on 2/22/02, thus one of the two sets claims above must be canceled.

Restriction/Election

2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 5, 6, 52, 53 and 55-61, drawn to a line-at-a-time electronic driving method, classified in Class 345, subclass 54.

II. Claims 62-81, drawn to the driving a microelectromechanical device, classified in Class 359, subclass 290+.

Art Unit: 2873

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I and II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I and II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and II would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
